No 1863 of 1880 189

Remarks on Mr. S. R. Shakir's

Administration Report for 1879/80.

Letter No 172 dated 15 July 1880.

I. In the Statement in Para 4 Sayer Rememo is omitted and the Cause is not explained.

II. Para 14. The irregularities caused in the accounts by the famine and the leniency shown in bringing out standing balances have undoubtedly given the village officers opportunity of being lax in their duties especially in making collections and they must be strictly dealt with but the number of fines inflicted by Mr. Shakir is very large. Out of 286 fines inflicted in the whole District on village officers for negligence in their revenue duties 199 are inflicted by him.

6. No remissions have yet been granted: but applications will soon have to be made to government for that purpose. Almost all over Bagewadi, & in a considerable part of Bijapur, the land was last year taken away from those who had disappeared or been too utterly ruined by the famine to cultivate any more. Throughout the remainder of Bijapur & the whole of Gadebihal, the sales are being carried on now: & as soon as they are complete, lists will be forwarded of those to

whom remissions will have to be given. Ryots who are still able to cultivate have been treated with leniency & time afforded them An estimate is being prepared, & is very nearly complete now, of the sums which are irrecoverable, except by sale of occupancy, for the three years 1876-77, 1877-78, & 1878-79 in my three Talukas.

His existence therefore is to be ascribed to the Inamdutdars, who have all worked hard in getting in the Revenue, & succeeded well: the Bagwadi Inamdutdar conspicuously so. The Mudebihal Inamdutdars has had the greatest difficulties to contend with, as there were far more people ruined in his Talooka than in the Others.

The Bagewadi Dispensary has only just been opened. The Bijapur Dispensary seems much the most successful: owing, in some measure, to the size of the town, but chiefly to the efficiency, zeal, & deserved popularity, of Ganu Dhanowti who has been in charge of it for about 5 months, & under whom the attendance has very largely increased.

The birth & death registers have been examined by me in 10 villages. I exhibit as usual a preponderance of deaths over births. As the deaths at present do no doubt exceed the births, it is not easy to say whether the forms are more carefully kept than before. As I think more use might be made of the vaccinators in this way, I have directed the Inamlutdars to make them test the birth register in every village they visit in the current year, & mention, in forwarding their weekly lists, every case in which they find births not

recorded. The subject of extramural burning & burial grounds has engaged attention & several proposals have been submitted to, & sanctioned by, Government to set aside portions of unoccupied land for this purpose in villages unprovided with such accommoda :tion.

32. No special disease or epidemic has made its appearance: but bad ulcers, induced by poor blood consequent on poor food, have been remarkably prevalent, though now diminishing.

The birth & death registers have been examined in me in 10 villages. & exhibit as usual a preponderance of deaths over births. As the deaths at present do no doubt exceed the births, it is not easy to say whether the forms are more carefully kept than before. As I think more use might be made of the vaccinators in this way, I have directed the Inamlutdars to make them test the birth register in every village they visit in the current year, & mention, in forwarding their weekly lists, every case in which they find births not

recorded. The subject of extramural burning & burial grounds has engaged attention & several proposals have been submitted to, & sanctioned by, government to set aside portions of unoccupied land for this purpose in villages unprovided with such accommoda :tion.

52. No special disease or epidemic has made its appearance: but bad ulcers, induced by poor blood consequent on poor food, have been remarkably prevalent, though not fatal in termination.

I submit that a deal of good might be done by subsidising old & popular private schools, and interfering with them as little as possible. The Anglovernacular class in Bijapur which has been closed for a long time has, I am glad to say, been reopened last April the Municipality contributing half the master's pay.
